

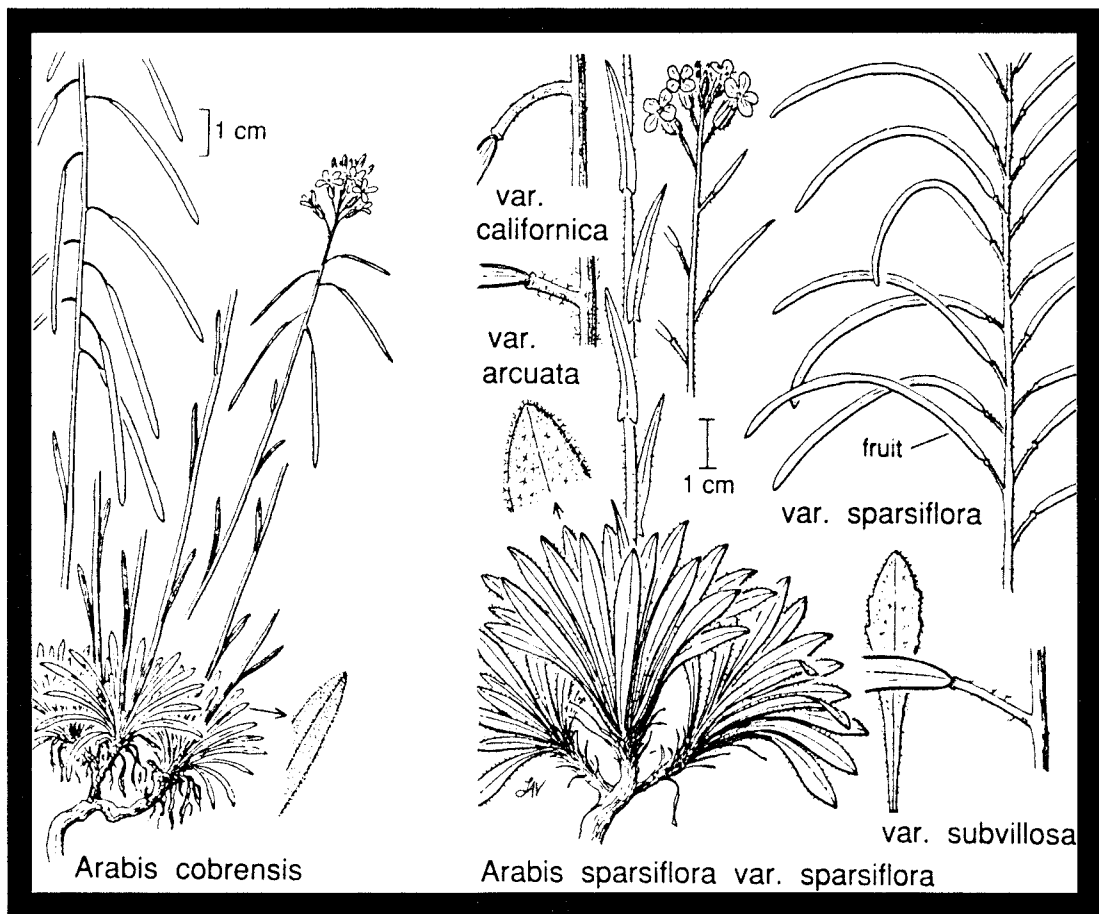

Figure 1. Composite line drawing approximating *Arabis falcifructa*. Stems, leaves, and young inflorescence of *Arabis cobrensis* by Linda Ann Vorobik (from Hickman 1993, p. 401; see figure 2), and mature infructescence of *Arabis lignifera* and *Arabis holboellii* var. *pinetorum* by Jeanne R. Janish (from Hitchcock and Cronquist 1973, p. 154-5).

2

Figure 2. Line drawings of *Arabis cobrensis* and *Arabis sparsiflora* by Linda Ann Vorobik (from Hickman 1993, p. 401, 405), two species superficially similar to *Arabis falcifructa* and sometimes confused in the field.

Figure 3. Basal leaves of *Arabis falcifructa* at site 2, showing surrounding moss cover, plants in late fruit on 26 July 1991. All photographs by James D. Morefield. See appendix 1 tables for site descriptions.

Figure 4. View of entire individual of *Arabis falcifructa* shown in figure 3. (Turn 90° clockwise for correct view.)

Figure 5. Habitat of *Arabis falcifructa*, showing surrounding moss cover, individual from figure 3 in foreground. (Turn 90° clockwise for correct view).
